DIGITAL IMPLANT SURGERY

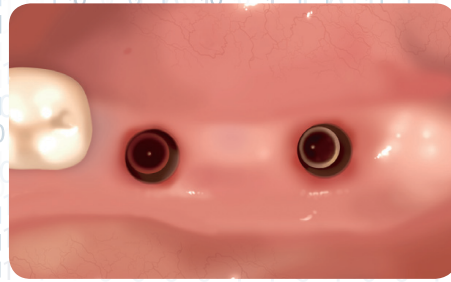

What is Digital Implant Surgery?

Digital dental implants are a wonder of modern dentistry. They are replacement teeth that are supported by your jawbone, just like natural teeth, so they allow you to enjoy all your favourite foods, require no special care and may last a lifetime if properly cared for.

3D virtual operation program is utilised to accurately analyse bone and tissue morphology to determine the best possible position for implant fixture.

How Does it Work?

Dental implants are the only tooth replacement option that fully perform all the functions of your natural teeth.

- Completely natural in appearance
- Allow you to eat all the foods you enjoy now
- Require no special care - just brush, floss, and make regular dental visits
- Don't depend on your natural teeth for support
- Can last a lifetime with proper care - 30+ years of proven life, although the crown may need to be replaced

Benefits of Digital Dental Implants

Traditional dental implants definitely have many benefits. However, with digital dental implants you can get the same benefits with a more streamlined procedure that gives you a better experience. The benefits of the new digital dental implant procedure include:

- Shorter implant procedure (as little as 15 minutes)
- Get your replacement tooth faster
- More comfortable process
- Less visits to the dentist
- Excellent occlusion
- Greater accuracy and stability

**STEP
1**

Consultation & Scans

We'll talk about your implant goals, then take a comprehensive suite of scans that allows us to construct a detailed 3D model of your teeth.

**STEP
2**

Create a Surgical Plan

Using the 3D model, we will analyze possible surgical plans and test each one in a series of mock surgeries to determine the optimal surgical approach for you.

**STEP
3**

3D Print Surgical Guide

We will use a CAD/CAM system to 3D print a surgical guide based on your optimal surgical plan. The surgical guide ensures a safe, accurate, and fast surgery.

**STEP
4**

Place the Implant

We will place your dental implants in as little as fifteen minutes with no-incision surgery. You can get customized abutments and/or temporary teeth right away.
