Re Diva – ZYDUS HOSPITALS

AN ADVANCED & COMPREHENSIVE HEALTHCARE FACILITY FOR WOMEN

ZYDUS Hospital understands the growing medical needs of today's woman. It is with these special needs in mind that we have set up the Gynaecology department for complete Women's Wellness.

The department offers a wide range of holistic screening packages tailored to meet the needs of women at various stages of life.

The Gynaecology Department makes you and your care a priority. We provide a place where women can come and can benefit from our highest standards. Our services have been developed specifically to bring confidence, comfort and peace of mind to the physical and mental welfare of women.

This department has been designed specially to meet the needs of women, while providing a high level of comfort in a calm and relaxed environment.

We offer our patients a broad range of female health services. We combine everything from personalised out-patient consultations that deal with matters such as pre and post natal support and gynaecological services, to complementary therapies and allied practitioners, such as nutritionalists and physiotherapists. In line with our extremely high standards, you will find that we house the most experienced Consultants and practitioners in the industry today.

OUR UNITS

Infertility & IVF (Test Tube Baby)	3D, 4D Sonography, Colour Doppler & Foetal Medicine

2 Labour room | Exclusive obstetrics OT | Foetal Doppler | HFO ventilator

OBSTETRICS & GYNAECOLOGY INCLUDING INFERTILITY & REPRODUCTIVE MEDICINE (IVF) AND FOETAL MEDICINE

The Gynaecology Department at Zydus Hospital is amongst the best in western part of the country with dedicated birthing suites and equipped state-of-the-art infrastructure to follow the progress of labour and provide a facility for delivery. The department has dedicated operating rooms for caesarean section in the same complex.

The department also offers Laparoscopic surgery for removal of tumors and cysts through key-hole incisions including high-end surgical solutions for management of complex disorders like Double Uterus, Intra-uterine Fibroids and Adhesions, without incision or stitches. Super specialists in the field of laparoscopic gynaecology and foetal medicine routinely perform intra-uterine foetal procedures such as Correctional Surgeries and Foetal Reduction.

Having a team of experts that has achieved excellent success rate and has helped couples in realizing their dreams of parenthood, the IVF centre at the Hospital is unique for being the first-of-its-kind in Western India to have a modular culture lab. The Hospital aims at providing the most successful, highest quality fertility treatment in a personalised and confidential environment.

PAEDIATRICS, NEONATOLOGY AND ADOLESCENT MEDICINE

The Department of Paediatrics, Neonatology and Adolescent Medicine is one of the most comprehensive Centres for child care in the entire region and provides excellent care in General Paediatrics, Asthma & Allergy, Adolescent Medicine, Child & Adolescent Psychiatry and Psychology, Developmental Paediatrics, Endocrinology, Gastroenterology, Haematology and Oncology.

The Hospital has a dedicated Paediatric Surgery program for a wide range of congenital and acquired conditions requiring surgical intervention.

The 18 bed NICU unit is equipped with high-end monitors, incubators, high frequency ventilators and surfactant therapy to deal with any level of medical complications in the newborn. The Centre also has a 9 bed paediatric ICU managed by one of the most experienced team of highly specialised intensivists in the country.

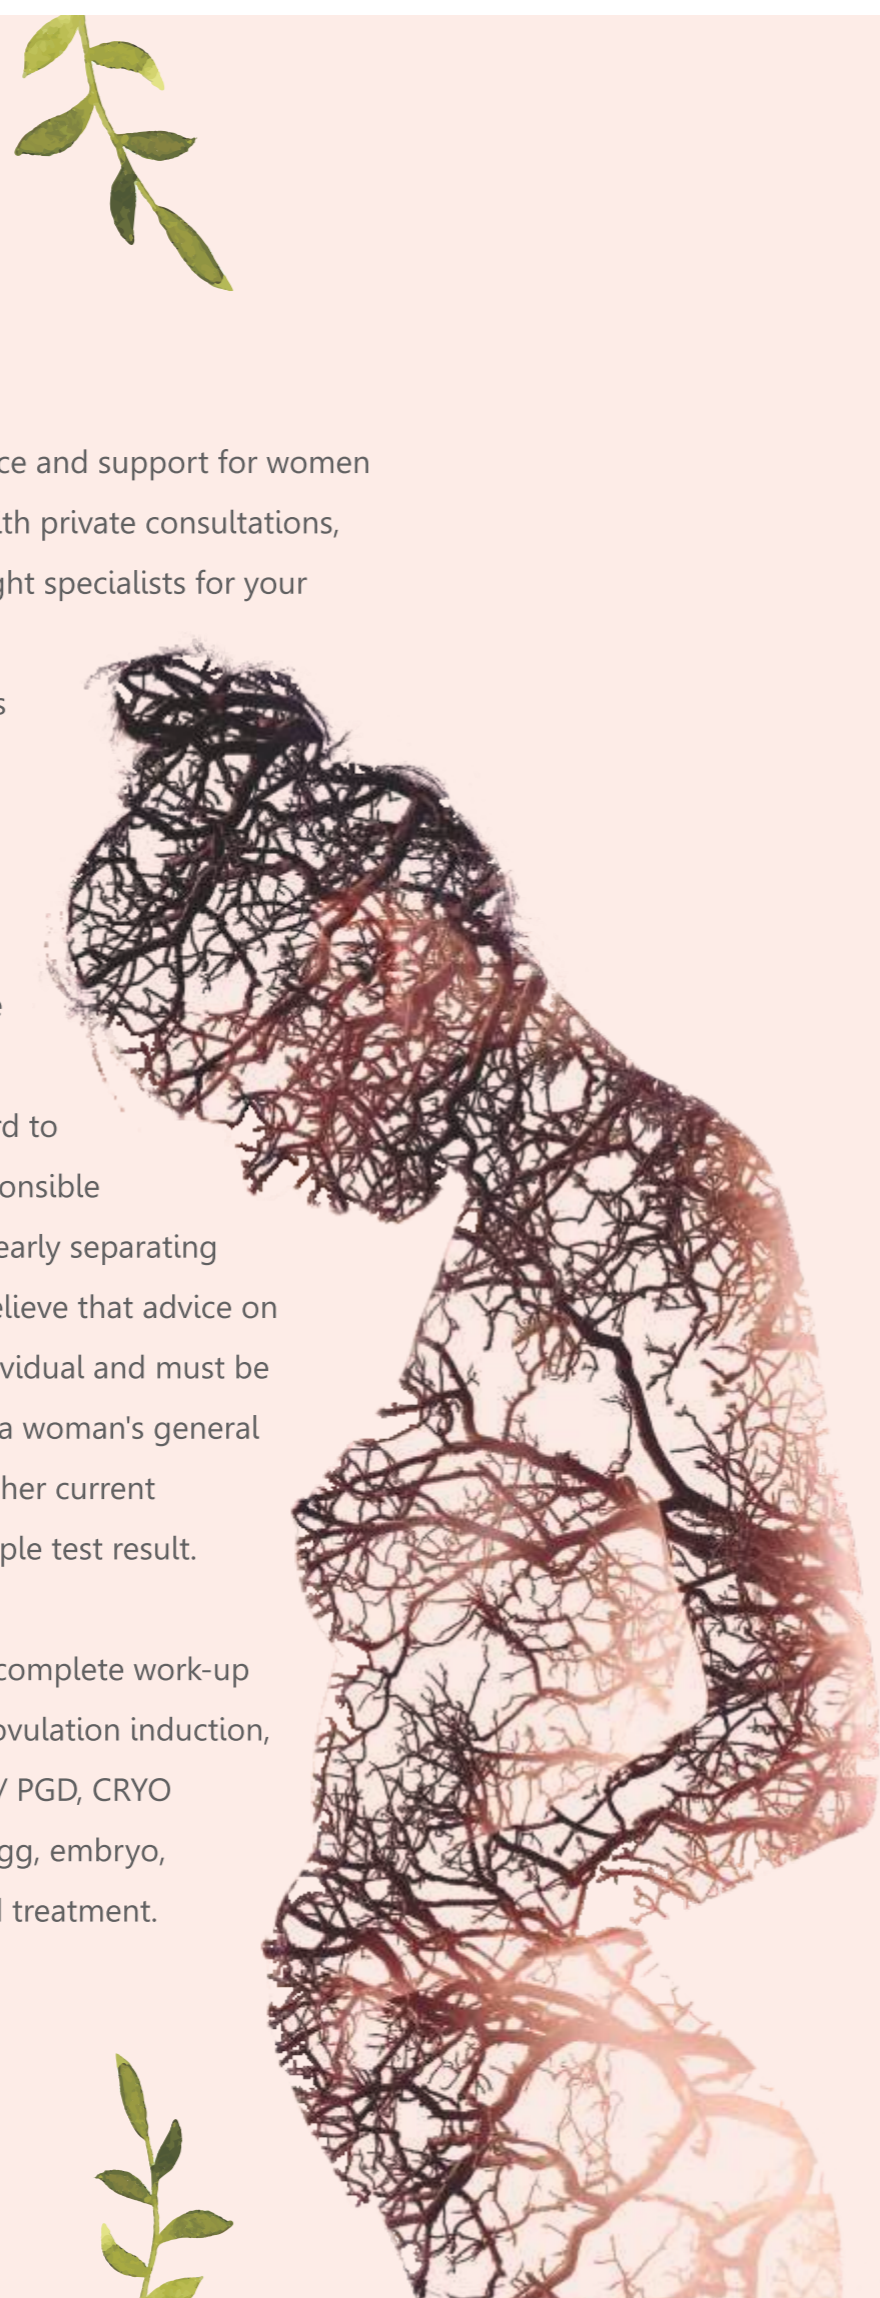

SERVICES OFFERED

FERTILITY

Re Diva is proud to offer expert advice and support for women interested in our fertility services. With private consultations, we ensure that you meet with the right specialists for your particular needs. Whether reviewing ovarian reserve screening test results or advising on issues around sexual health, recurrent miscarriages, male factor infertility or other issues, we will offer you support each step of the way. Although advice is available from many different places, sound advice that you can trust is often hard to come by. Our priority is to offer responsible advice based on clinical evidence, clearly separating the facts from the hypothesis. We believe that advice on reproduction depends upon the individual and must be based on a thorough assessment of a woman's general health, her reproductive history and her current circumstances, rather than just a simple test result.

The broad services offered here are complete work-up for infertile couple, treatment plan, ovulation induction, follicular trekking, IUI, IVF, ICSI, PGS / PGD, CRYO banking, Donors' program (sperm, egg, embryo, surrogacy) and all investigations and treatment.

OUR INFERTILITY SERVICES ALSO INCLUDE

SONOGRAPHY SERVICES

THE DEPARTMENT IS EQUIPPED WITH STATE-OF-THE-ART MODERN ULTRASOUND MACHINES

Ultrasound provides highest resolution image and helps diagnosing anatomical defects in the foetus. Good sonography techniques, updated knowledge, state-of-the-art machines and years of experience are the perfect guide to precise and correct diagnosis. At Re Diva the entire gynaec team and sonology team are adept at diagnosing all sorts of Obstetric and Gynaec diseases.

Backed by a full time radiologist and foetal medicine expert for assisting in obstetric sonography (first trimester, anomaly scan, growth scan and colour doppler), and gynaec sonography (follicular study, ovarian volume and mid cycle uterine cavity volume), assesment of uterus, ovary, antral follicle count, endometriotic cysts, dermoid cysts, hydrosalpinx, parovarian cysts, uterine artery doppler, fibroids, adenoma, uterine anomalies like septum, bicornuate, unicornuate uterus.

SOME OF THE SERVICES INCLUDE : Ultrasound guided procedures like chorion villus sampling (CVS), amniocentesis, selective multi-foetal reduction (in cases of triplet, quadruplet pregnancies), ovarian cyst aspiration ovum pick-up and embryo transfer.

FOETAL MEDICINE

Foetal Medicine is mainly involved in using various diagnostic procedures to determine the health of the unborn child. We specialize in diagnosis, comprehensive management and counselling, especially when pregnancies are complicated due to foetal abnormalities.

We provide pre-conception counseling, genetic counseling, prenatal diagnosis including comprehensive and targeted ultrasounds, first trimester screening, Multiple Marker & NIPT, chorionic villus sampling, amniocentesis, among others.

Our expert faculty consists of highly trained maternal-fetal medicine specialists with extensive experience in the management of the most complex maternal and fetal disorders. Pregnant women suffering from serious medical disorders such as epilepsy, preeclampsia, chronic hypertension, renal disease, heart disease, diabetes are cared for routinely in our center. We also have extensive clinical experience in the management of pre-term labour, cervical insufficiency and pre-term premature rupture of membranes.
