Department of Pain Management

Qualified & Expert Doctors | Advanced & Latest Equipment | Transparent Billing

Zydus Pain Clinic focuses on alleviating pain by diagnosis of the causative factors and effective management of pain to help you lead a normal life.

DIFFERENCE BETWEEN ACUTE & CHRONIC PAIN

Acute pain is first sign that, a damage has occurred somewhere in your body, whereas Chronic pain is different, where our body keeps hurting for weeks, months, or even years after the injury. It may originate from peripheral nerves, spinal cord or brain.

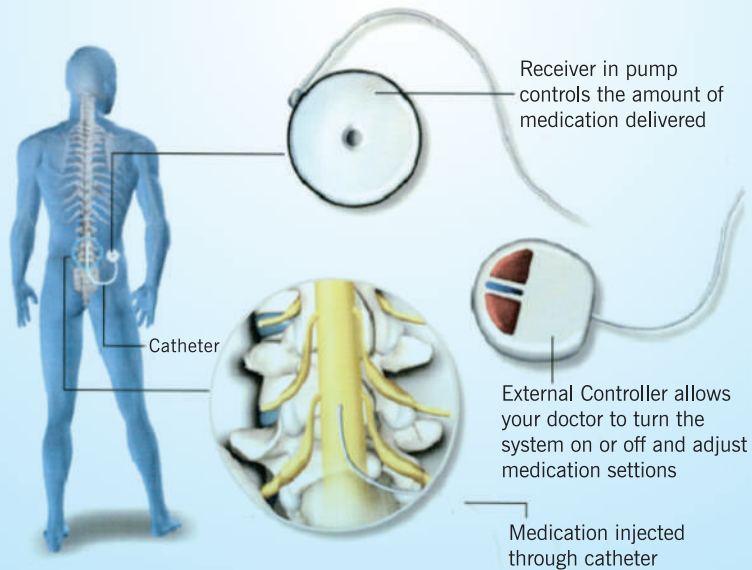

EFFECTS OF CHRONIC PAIN

Chronic pain can have all kinds of effects on your quality of life and can lead to problems such as anxiety and depression, which in turn can make pain even worse.

WHAT IS INTERVENTIONAL PAIN MANAGEMENT?

Pain Management is the 34th specialty of Medicine. It is possible to diagnose and treat chronic pain. Interventional pain management involves minimally invasive methods to manage & control pain.

ADVANCED INTERVENTION Intrathecal pump implant
