

The Department works closely on preventive aspects of Gynaecology focusing on through it's Women Health Check Program, regular pelvic exams, cancer screening. Testing and treatment for vaginal infections and reproductive system. Diseases such as infertility, endometriosis, ovarian cysts, fibroids, and tubal status are some of the areas the department focuses on.

Our IVF & Fertility Preservation Experts are specialised in treating infertility with assisted reproductive technology and all the processes of protecting / preserving eggs, sperms or reproductive tissue by different methods involving frozen eggs, frozen embryos and frozen ovarian tissue.

Commonly performed Surgical interventions:

- Laparotomy and open Gynec surgery
- Diagnostic and operative Hysteroscopy
- Diagnostic and operative Endoscopy (Laparoscopy)
- Robot assisted Gynec surgery
